Mr. Laughlin,

Foam Experts Roofing has installed the urethane foam roof system at several of our National Park areas in Arizona and New Mexico within the past 24 years. The system has been applied on a variety of buildings, such as Visitor Center/Museums, employee housing, maintenance/utility and campground facilities.

This company has demonstrated and executed total construction management during the course of an entire project, with the utmost professionalism and competence. They have proven to be quite knowledgeable in all phases of construction standards and practices of the roofing industry, including code requirements. Their workmanship and detailing clearly reflects their experience in accomplishing a quality finished end product.

If and when given the opportunity, I would not hesitate to work with this company on any upcoming roofing projects and are highly recommended by this agency for this type of work.

Sincerely,

A handwritten signature in black ink that reads "Sam R. Romero". The signature is written in a cursive, slightly slanted style.
