Our home, like many homes, has been remodeled several times and has a great expanse of roof area. We have a foam roof and have been satisfied with this type of roof. The oldest part of the roof was deteriorating badly. I contacted several companies and no one seemed anxious to rush out to see what should be done to repair my roof. Then I contacted Foam Experts Roofing Inc. and within the hour they had Terry Hahn their Project Manager inspecting the roof. He inspected the whole roof, showed me where we had serious issues with the old foam and where we had good roofing. He came back to me the same day and gave me a comprehensive bid to restore the entire roof. The project was done in 2 weeks from the day I called them.

This is a very professional firm that I would highly recommend if you have roofing needs.
