To Whom It May Concern:

If I could give **Foam Experts Roofing** a 6 star rating I would. They exceeded my expectations in all areas. Todd came on time for my estimate, answered all my questions in an un-hurried manner and within 24 hours provided me with some information I requested. When I questioned the quoted price for plywood (if needed), he lowered the price. As for the roofing crew they also came on time, allowed me on the roof to observe, and answered all my questions. The most amazing thing, however, was that Olin, the 74 year old owner of the company, spent most of the day actually on the roof supervising and guiding the crew in how to deal with an unexpected problem. His extensive experience was clearly shown in the finished product which was absolutely perfect. The crew also did a fantastic job cleaning up afterwards. In summary, the price was very fair, the quality of the work was excellent, and I unequivocally recommend them if you need a new foam roof. Olin jokingly said not to write my review until after the first rain. But in Arizona that might be months away. And, besides, they gave me a ten year warranty to repair all leaks at no cost to me.
